

Go Green... Go Bottle-less!

In 2005 Americans drank more than **30,000,000,000** single-serving plastic bottles of water.

Supplying these bottles to American Consumers for one year requires **47,000,000** gallons of oil and releases **1,000,000,000** pounds of carbon dioxide into the atmosphere.

*You CAN make a difference!
We can tell you how.*

HIGH-QUALITY, GREAT TASTING

WQA CERTIFIED SERVICE TECHNICIANS

Going Green starts at just \$30/month!

Corrigan installs and maintains reverse osmosis and other water filtration systems that offer some of the highest quality drinking water available at a substantially reduced monthly cost in comparison to bottled water.

These systems provide an **ENDLESS** supply of drinking water to bottle-less water coolers, ice machines, coffee makers and any other locations where water quality is important. We will accommodate any type of facility.
