

CRO300 Reverse Osmosis System

Corrigan reverse osmosis filtration will increase your sales and profits with water that:

- Won't leave mineral and scale residue on surfaces
- Sharply lowers maintenance on water using equipment.
 - Makes better tasting beverages and ice

**A Reputation for Creating Value
Through Quality Equipment**

CRO300 Applications

- Automatic misting systems (helps eliminate scale spotting).
- Ice Machines
- Bakery equipment
- Steam Tables
- Floral
- Water vending equipment
- Steam equipment
- Deionization pretreatment
- Coffee & Post Mix Equipment

CRO300 Features

- 330 gallons per day
- 99% rejection of dissolved solids
- Permeate auto-flush*
- 2.5" x 21" high flow membrane
- 50% recovery (one gallon to drain for every gallon made)
- Low feed-water pressure switch with lockout and reset button to prevent damage to pump
- Adjustable tank pressure switch
- 20" Sediment and Carbon pre-filters included with system

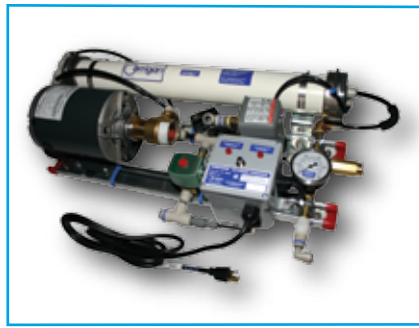

HuperSoft
Reverse Osmosis System

SYSTEM COMPONENTS

Filtration

Two larger 20" filters for greater filtering ability and longer time between changes.

RO System

Includes long-life membrane design as clean water automatically flushes hard water off membrane after each cycle.

Accumulator Tank

Eight gallon water storage tank provided as standard, larger available.

SYSTEM INFO

Reverse Osmosis Makes a Difference

Because the water going into it can adversely effect water-using equipment, hard water and scale will translate into high maintenance cost. The process of reverse osmosis removes hardness ions and other scale constituents, thus producing purified water and significantly reducing service expenses.

"Fresh Ideas...Practical Solutions"

We offer a free water analysis to determine the best filtration choice for you location. Call 800-462-6478

***Permeate Auto-Flush** - After filling the storage tank, a typical RO shuts down leaving hard water inside the membrane. This hard water drastically shortens the life of the membrane and effects water quality upon start-up. The Permeate Auto-Flush cleans hard water off the membrane using some of the high quality water from the storage tank after each cycle. This process prolongs membrane life and improves water quality.

A Corrigan Reverse Osmosis System

Since our invention and patent of the automatic produce mist system in 1979, Corrigan has grown to be a leader in perishable controls for the supermarket industry. Our experience and innovation is exemplified in quality equipment, and committed people that are dedicated to customer satisfaction. The CRO300 is a dependable, low-maintenance reverse osmosis system.

Also Available: CRO850 for 850 gallons per day
