Corrigan

UltraMist™ is ideal for applications requiring misting. From produce, to evaporative cooling, to greenhouses, to whole seafood, UltraMist™ suits them all.

- Smallest profile, ideal for mounting in all cases
- All nozzle spray patterns
- Available locking head
- Optional 360° pivoting head
- Strong schedule 80 pipe
- Available in black or white
- Fast install and easy maintenance
- Most versatile system for resets
- Patented
- Best industry warranty
- Certified by NSF169

UltraMist™

A misting system, simple to use and maintain, is also easy to order!
Determine the length, color and proceed to step one.

STEP: ONE

Select misting filtration.

PumpPak Filtration

Select when water hardness is low. Standard one-micron filter removes sediment that would otherwise clog nozzles and solenoids.

CRO300 Reverse Osmosis

Select when scale buildup on cases is a concern. CRO300 removes minerals and uses a unique membrane flush for longer service life.

STEP: TWO

Select misting controller.

ACP Controller

Select when all that's needed is timer control to turn misting on and off automatically. No drip - Instant on instant off operation.

QueTwo Audio Warning Controller

Select when audio marketing is desired. Stereo sounds provided by Corrigan or download audio to the flash card memory. You can easily change messages for sales, seasonal, specials... It's as VAST as your imagination.

STEP: THREE

Select UltraMist™ nozzle patterns.

80° Hollow Cone

Select this nozzle if misting is installed in canopy of produce case. Typically used with the fan style nozzle in an alternating fashion.

Fan Style

Select this nozzle if misting along the back of produce case to avoid overspray on mirrors. Also used for narrow product displays.

110° Hollow Cone

Select this nozzle for under-shelf installations and when product is close to mist bar.

Full System

Example of typical installation.
